STATE OF CALIFORNIA.

PUBLIC SCHOOL REGISTER

— OF —

Lafayette District, No. _____, County of *Contra Costa*.

INSTRUCTIONS TO TEACHERS.

Extract from Sections 1696 and 1700 of the Political Code.

SEC. 1696. Every teacher in the public schools must:

5. Keep a State School register.

6. Make an annual report to the County Superintendent at the time, and in the manner, and on the blanks prescribed by the Superintendent of Public Instruction. Any school teacher who shall end any school term before the close of the school year, shall make a report to the County Superintendent immediately after the close of such term; and any teacher who may be teaching any school at the end of the school year, shall, in his or her annual report, include all statistics for the entire school year, notwithstanding any previous report for a part of the year.

7. Make such other reports as may be required by the Superintendent of Public Instruction, County Superintendent, or Board of Trustees or Education.

SEC. 1700. No warrant must be drawn in favor of any teacher, unless the officer whose duty it is to draw such warrant is satisfied that the teacher has faithfully performed all the duties prescribed in section sixteen hundred and ninety-six.

SUGGESTIONS.

It is of the highest importance that this Register should be accurately and carefully kept. As the schools in which it is to be used are of all grades, it is impossible that it should be arranged to exactly meet the wants of all. In the details of its management, teachers must exercise their own ingenuity and adapt it to their schools as best they can.

All entries, except the Daily Record, should be made with ink. Care should be taken to fill out the right day of the month over the letter denoting the day of the week.

When a pupil enters school for the first time, a capital "E" should be placed in the square for the day; and when one enters after the absence of more than one week a capital "R" should be placed in the square for the day, signifying "re-entered."

When a pupil is absent more than five consecutive days, or one week, from sickness or any other cause, he is to be regarded as having left, and a capital "L" should be placed in the square of the day following. For example: if the scholar should attend at the beginning of the month, continue one week, then be absent ten consecutive days, or two weeks, he would stand at the end of the month as belonging to the school five days, with no absences marked against him. Absences for any number of days less than five should be checked against the pupil. This is the rule adopted in most of the Eastern city schools.

When a pupil enters school after the month has commenced, a black or red line should be drawn against his name from the beginning of the month to the day of entrance; and when the pupil leaves before the close of the month a line should be drawn against his name from the date of leaving to the end of the month. These lines will show to the eye what part of the month a pupil is not regarded as a member of the school.

Denote attendance by a blank; half day's absence by an acute angle, or V; whole day's absence by two, thus: V V; tardiness by a sloping line, thus: /. This may be kept in the upper half of the square, leaving the lower half of the square for record of deportment and scholarship.

Perfect deportment may be indicated by five credits—any violation of the rules subjecting the pupil to a loss of one or more credits; a perfect recitation may be indicated by three credits, an ordinary one by two, a poor one by one, a failure by none. A pupil who recites four perfect recitations during the day would be entitled to twelve credits in the square for the day; or some mark may be used in one corner to denote good lessons, and another in the other corner to denote bad ones.

The most important points to be determined by the Register are as follows:

1. The whole number enrolled.
2. The average number belonging to the school.
3. Average daily attendance.
4. Percentage of attendance on the whole number belonging.

The whole number of different scholars enrolled during the month will be found by counting the number of names entered. To find the average number belonging to school during the month, add the total number of days' attendance in the column headed "Number of days present," to the total days' absence, in the column headed "Number of days absent," and divide the sum by the number of school days in the month. Example: 380 (total days' attendance) + 62 (total days' absence) = 442; 442 ÷ 20 (number of school days) = 22½, the average number belonging to the school during the month. To find the average daily attendance, divide the total number of days' attendance by the number of school days in the month. Example: 380 (total days' attendance) divided by 20 = 19, average daily attendance.

To find the per cent. of attendance on the whole number belonging, divide the average daily attendance by the average number belonging. Example: 19 (average daily attendance) divided by 22½ (average number belonging) = .86
